

9-12-2017 / 2 Hour Breakout / 2pm-4pm

- Project in Jot posting?
- Dependencies from Fabricius dot IO
- Is the project just moving + Automatically measured metrics a picture of how moving, harder to get metrics.

"Activity Metrics" → For the things happening ^{day} that we don't need to put
Contributor Reward metrics
Software Impact Metrics.

Growth - Maturity - Decline

↳ Measures indicated as we state by measures

✓
"CDE" is?

Growth, Maturity + Decline subgroup

Is it worth continuing to invest in Community X?

- What the signal?
- What could the impact be?

Development Metrics

① Number of new developers

② Value accumulation

people working on what parts of the project?

Community size is less important than the effectiveness of the community

Bus = n?
Homebrew or sublime
Bus = 1
Bus

Stability
Scalability

1. Patch Speed
2. Bug Resolution Speed

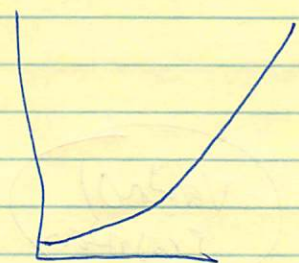

Bus Factor
- static environment
- frequency of Δ

→ proxy for value accumulation

③ Ecosystem → More dependencies may indicate that (proxy) the project overall is healthy

④ Maturity → Decline

Metrics we focus on may change as time Δ

"If people see a hockey stick moving from left to right, they are going to invest in that project."
